PROJECTS

Hobo: e-Commerce platform

Java SpringBoot, VueJS, postgresQL, MongoDB

Developed an e-Commerce platform for electronics, clothing and sports by using VueJS for front-end, Java Spring Boot for microservices and postgresQL, MongoDB for databases

QuizHum: quizzing app

Java SpringBoot, VueJS, MySQL

Developed leaderboard for QuizHum which includes daily, weekly, and monthly leaderboard REST APIs and a web UI to get the stats and leaderboard standings for various quiz contests.

ApnaAnaaj: Crop Price Prediction Web App

Python Flask, scikit learn, Material UI, Chart.js

Developed crop price prediction web app which makes price prediction for around 23 Indian commodities using Machine Learning techniques. Valuable stats such as top 5 performers of the month, 12 months prediction for a commodity etc along with the engaging UI makes it more powerful in decision making.
